

# A Clear Path From Evaluation to Go-Live

Industry-specific ERP built around the way lighting businesses operate.

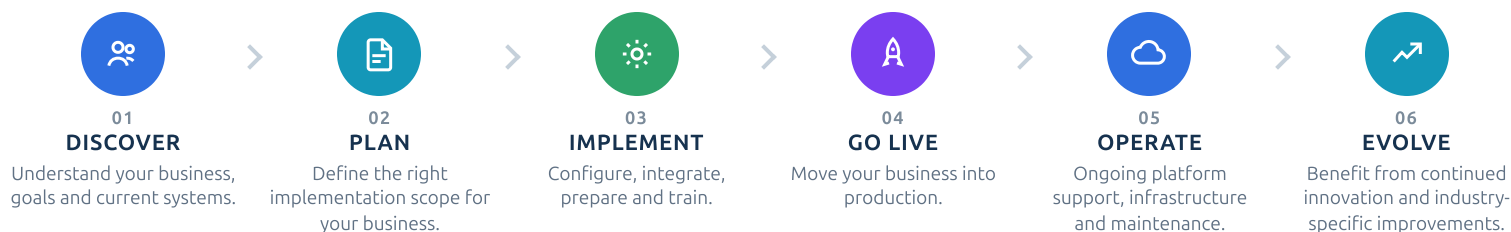

Moving to a new ERP is a significant decision. Showroom Ignite provides a structured path from initial evaluation through implementation, Go-Live, and ongoing operation — giving your team a clear understanding of what to expect at every step.

Better Tools.  
Stronger Operations.  
A Brighter Future.

## The Showroom Ignite Process

From discovery to ongoing support — we're with you at every step.

## Implementation & Subscription

Two parts. One powerful relationship.

**One-Time Implementation**  
Your implementation is scoped around the work required to prepare your business for Go-Live. The scope and investment can vary based on your business size, complexity, data, integrations and operational needs.

**Ongoing Subscription**  
After Go-Live, your recurring subscription provides access to the platform and covers infrastructure, security, maintenance, support and continued development.

## Tailored to Your Business

No two lighting businesses are the same. Your implementation is designed around what you operate, what you have and where you want to go.

- What you operate**  
Your locations, departments and workflows.
- What you already have**  
Your existing systems and business data.
- What you need to connect**  
Payments Integration, accounting, catalog, and your other systems.
- Where you want to go**  
Your future operational requirements and growth plans.

## The Value You Get

- Powerful, industry-specific ERP software
- Payments Integration** for a deposit, pay in full, or an invoice later.
- Cloud infrastructure and security
- Standard support
- Ongoing platform updates and improvements
- No per-user pricing
- A platform designed around your business — not the number of employees.

## Ongoing Innovation for a Stronger Tomorrow

Showroom Ignite continues to evolve with the lighting industry. Your subscription supports ongoing investment in new capabilities, workflow improvements, performance, security, integrations, user experience and industry-specific functionality.

- New Capabilities
- Workflow Improvements
- Greater Performance
- Enhanced Security
- Industry-Specific Features

## The Commercial Model

Simple. Predictable. Built for Your Business.

- One-Time Implementation**  
Scoped to your business, not your headcount.
- Ongoing Subscription**  
Includes the platform, infrastructure, support and continuous development.
- No per-user software pricing.** Add employees and grow without managing individual user licenses.
